# **Mater Vibrations**

**These vibrations exist on a higher plane than the single digits. The presence of master numbers suggests an older soul opening into this lifetime to make an important contribution to humankind in a field of spiritual, scientific, medical, religious, educational, governmental, or technological nature.**

**Often master numbers indicate an older soul trained in the ancient esoteric schools many lifetimes previously who now return to manifest or teach particular New Thought methods of healing, psychic development or invention.**

**In rare instances, the presence of master numbers indicate a dynamic soul who is incarnating this time from another planet or system to fulfill some specific destiny or mission.**

**Many old, important and masterful souls have names and birth dates with no master numbers, so we must be careful to keep this whole matter in perspective.**

**No matter where the master numbers appear, the higher vibration does not fully unfold until the soul has awakened.**

**In many instances, certain gifts manifest through grace. The individual possessing the gift may not have initiated conscious discipline and study of spiritual law in this lifetime.**

**Those who have master numbers appearing in their name or birthdate generally are endowed with special tendencies toward leadership and inspiration that set them apart from mass consciousness. Because the numbers are of intensified vibration and potency, those who possess them have a heightened obligation in life, such as greater requirements of self discipline and purification of consciousness. Until the needed purification and awakening of soul awareness takes place, the individual operates in the vibrational influence of the two rather than the 11, the four rather than 22, and the 6 rather than the 33.**

**The negative aspects of the 33 are the negative aspects of the 6 intensified to a very destructive level. Because this vibration is only given to the oldest and most qualified souls, it is doubtful that you need to consider the negative.**

**The person carrying this vibration must work at gaining a full realization of the fact that you are indeed a master soul and that you have great powers and abilities. You must also consider at the same time the enormous responsibility that goes hand in hand with these gifts.**

# **The Challenges**

**The Challenges show us weak links in our nature that need to be balanced. They bring certain influences to bear in an effort to get us to realize that we need to work on reinforcing certain aspects of ourselves.**

**Until they are dealt with, the challenges form rough spots on the path to achieving our destiny, and can hinder our success and achievements. They are concerned with material matters and outward relationships, and dealing with them requires inner growth as well as outward effort.**

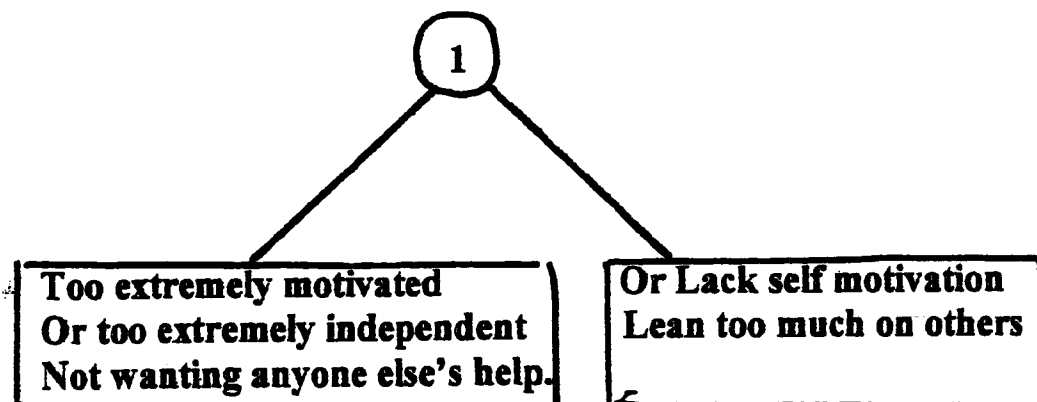

**When neglected, they can only present us with problems that generally appear unexpectedly, and we are often unaware of their importance at first.**

# **1**

## **CHALLENGE OF INDEPENDENCE AND INDIVIDUALITY**

**This challenge relates to the father, who is too domineering or not there emotionally or physically. Realizing that there is only oneness, you heal this challenge by knowing that the father is mirroring something in you that you have come to heal.**

**The healing of the challenge is to bring into awareness both sides of the extremes and allow the balance to occur.**

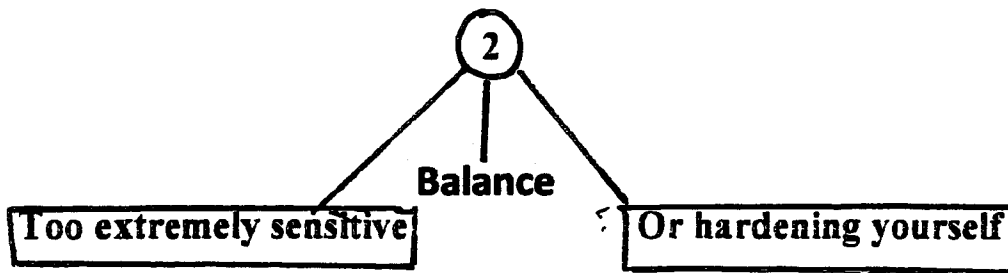

**On one side, you could become too full of self will, too macho, Conceited. Beneath this façade, there might be some fear that if you let go, you will fall into a deep gap.**

**On the other side, you must learn to stand on your own two feet in balance. Don't depend on others, instead let them learn that they can depend on you.**

**Develop your will power and strength of character or you will be subjected to being bossed and held down by others, especially those close to you.**

## CHALLENGE OF SENSITIVITY AND MASTERING THE EMOTIONS

**This challenge relates to too strong a tie to the Mother. It will be a strong merging through great love or great dislike. Either side creates too much extreme sensitivity or a hardening of yourself.**

**It will manifest in your life in the following ways.**

**Too much merging with others and giving away your power.**

**Co-dependence**

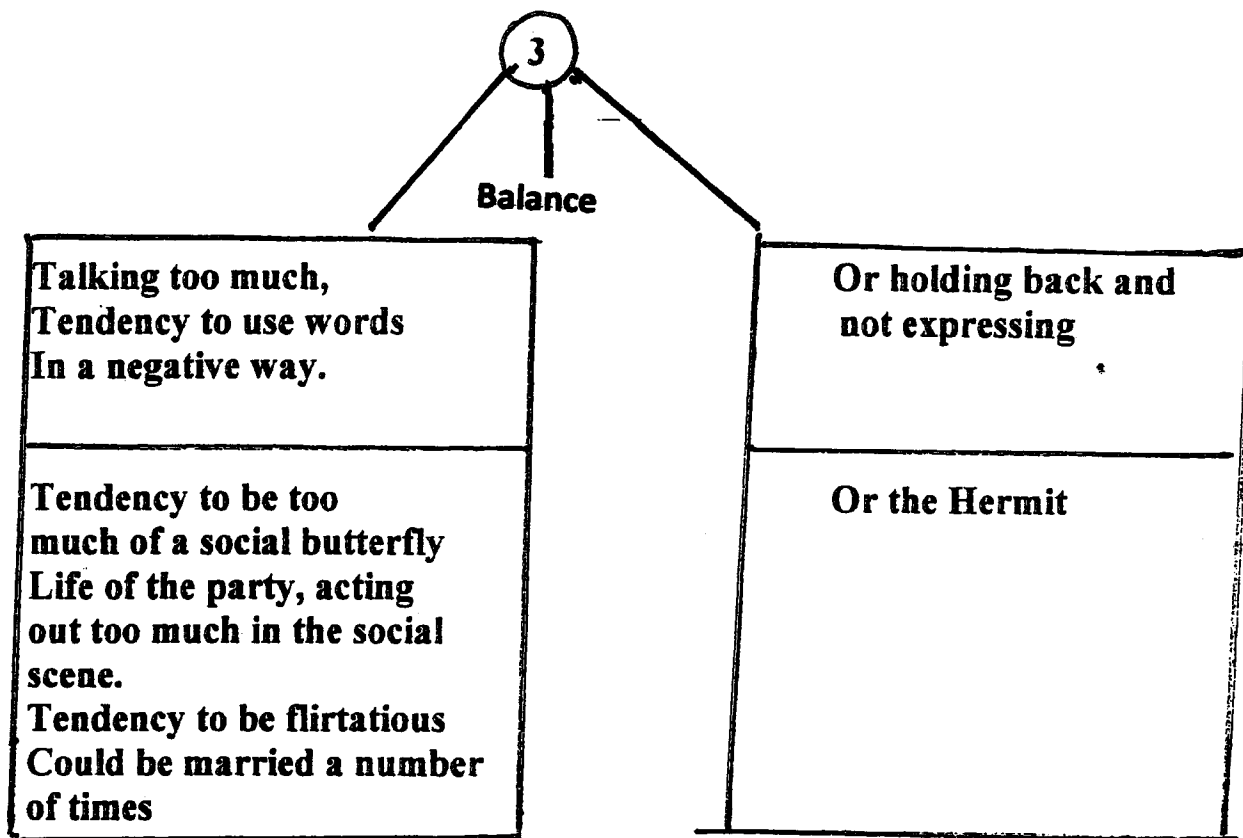

**Feeling victimized in life.**

**Wanting peace and harmony at any price so that you do not speak your truth.**

### **HEALING:**

**The healing of this challenge takes place as you learn that no one is putting you down and victimizing you. Your soul draws to you these situations that feel like victimhood, in order for you to realize that it relates to something in yourself that you came to heal. You learn to stop blaming others, and know that it is all about something in yourself. You learn to love all of the many parts of yourself, the shadow as well as the light.**

## CHALLENGE OF SELF EXPRESSION AND OPTIMISM

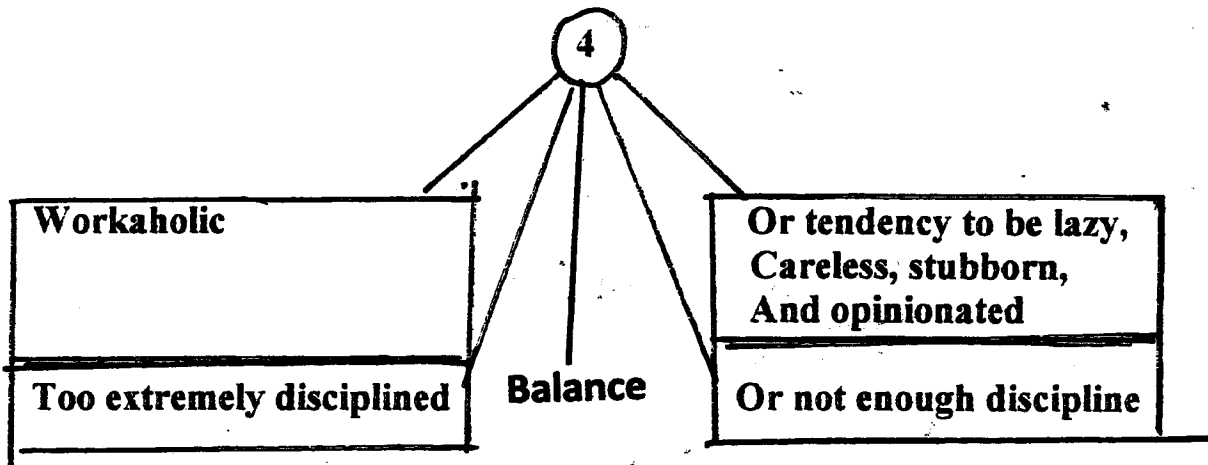

**There is a challenge with self expression and communication .**

- **The tendency is to talk too much and use words in a critical, negative way. Your thoughts, which are your inner words, could program you so that worry, moodiness, and depression become a part of your life.**
- **On the other side, you could hold back, stuff it, and not express yourself. You would find it hard to express yourself effectively.**

**Healing: Expression can take many forms and you could work at developing as many of them as you can. Try painting, acting, dancing , writing, speaking—any form of self expression that appeals to you. In communication, you can say anything as long as it is said in a loving way from a heart of love. Be careful with gossip and talking about others. Remember that when you point a finger at another person, there are three fingers pointing back at you and the thumb, going upward reminding you to take a higher look. Look deeper and behold the Christ. Remember also, that what we dislike in another is in some way mirroring for us some aspect of our own shadow.**

**4**

## **CHALLENGE OF SELF DISCIPLINE**

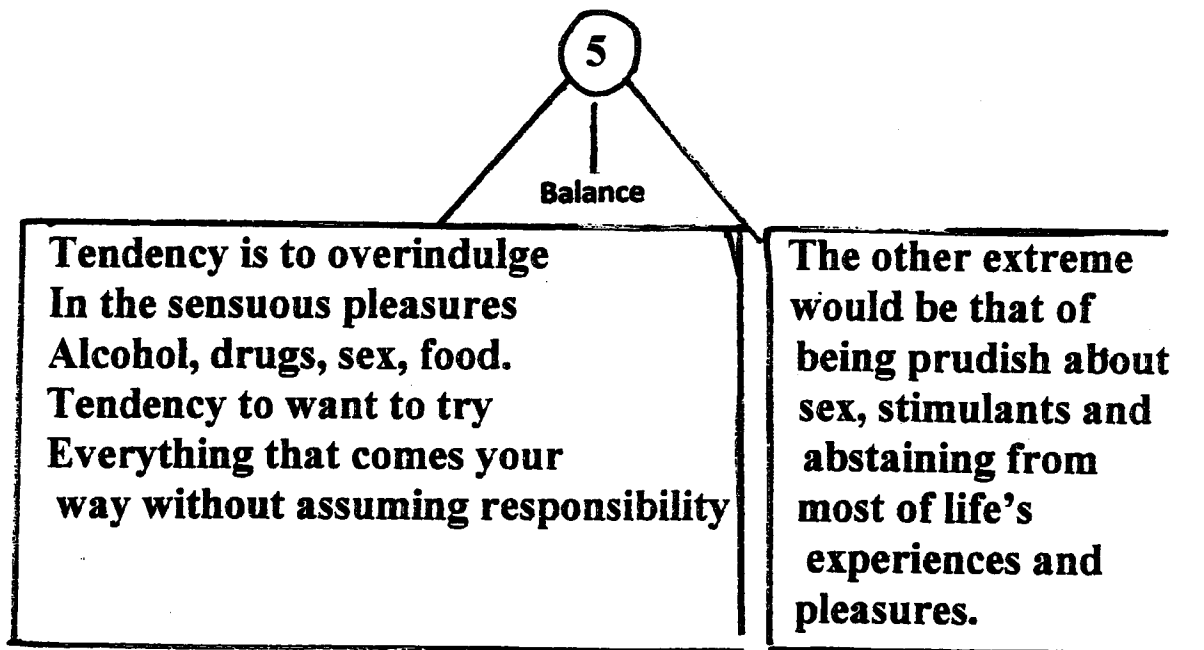

**With this challenge, you also have to learn PATIENCE and TOLERANCE.  
You learn not to procrastination or put off to the last minute.**

### **Healing:**

**You learn to put forth effort to achieve your goals, without letting life become a bore. You want to discipline yourself to be orderly, punctual, systematic, and develop the practical side of life. You learn to establish system and routine, but realize that life must have flexibility as well. It is the balance of the two extremes that you seek.**

**5**  
**CHALLENGE OF**  
**SENSUAL PLEASURES**  
**AND THE LESSON OF TRUE FREEDOM**

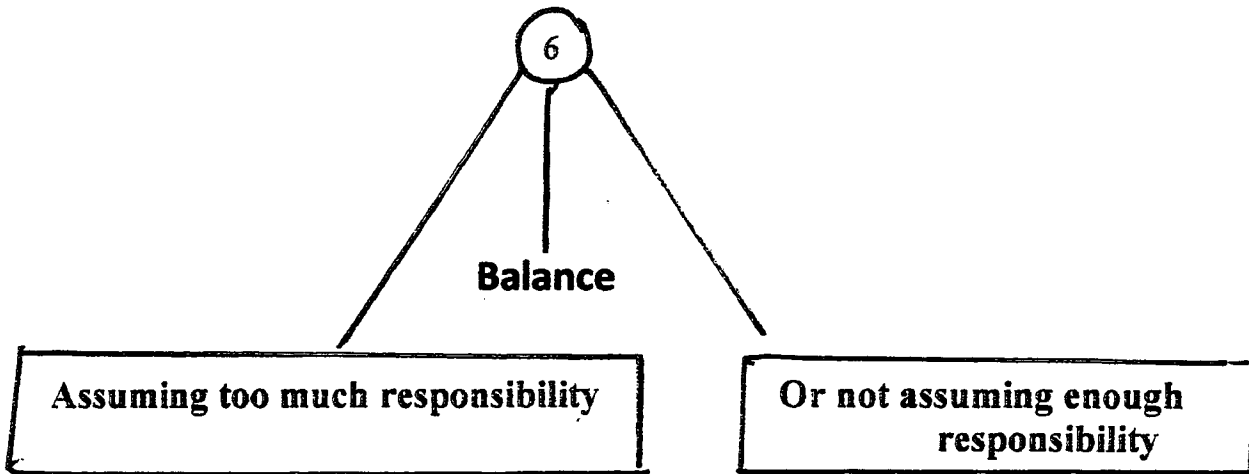

**The danger is the abuse of freedom. True freedom allows us to do that which is good, and lets us progress to the new and beneficial. Freedom does not mean doing whatever we please. We must realize that we have responsibilities to others and ourselves to live within certain laws- universal laws as well as social ones. It is a time to learn to use our freedom correctly. True freedom comes of us because of competent and thorough handling of our duties and responsibilities.**

**Balance:**

**You will learn to find balance so that your life is not so scattered in all directions. You learn to curb the insatiable appetites and see things through, finding balance as you assume true responsibility for meaning and direction in your life.**

# **6**

## **CHALLENGE OF RESPONSIBILITY AND SERVICE**

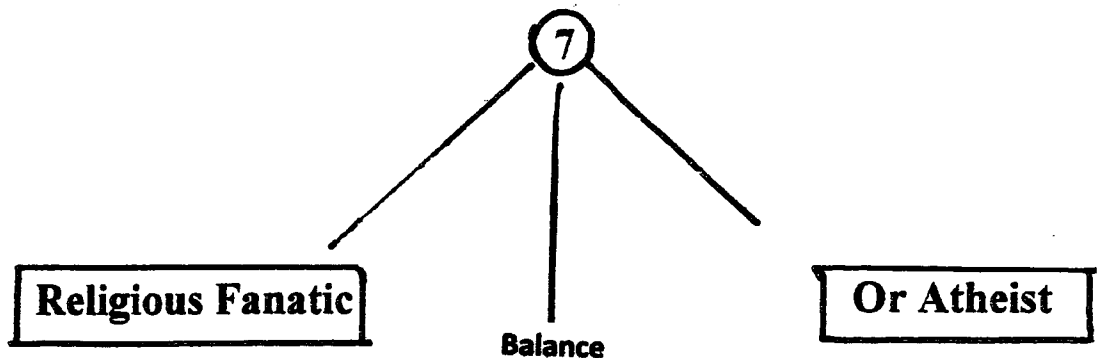

### **Balance:**

**It is the time to learn the value of giving willing service to all those in need and willingly attending to what may well be burdens that need your attention.**

**You have to be careful that you don't allow yourself to become so carried away that you take from others those responsibilities that they should handle themselves in order to learn needed lessons. This is where you have to learn to be discerning.**

**Be willing to give aid when you know it is needed.**

## THE CHALLENGE OF FEAR

**Most people are not affected to this extreme, however, you are skeptical about the spiritual aspects of life, and find it difficult to develop some kind of spiritual philosophy to help you relate to the world around you.**

**You may fall into bouts of fear and loneliness.**

**With this challenge, you have to learn to face your fears, which could be many.**

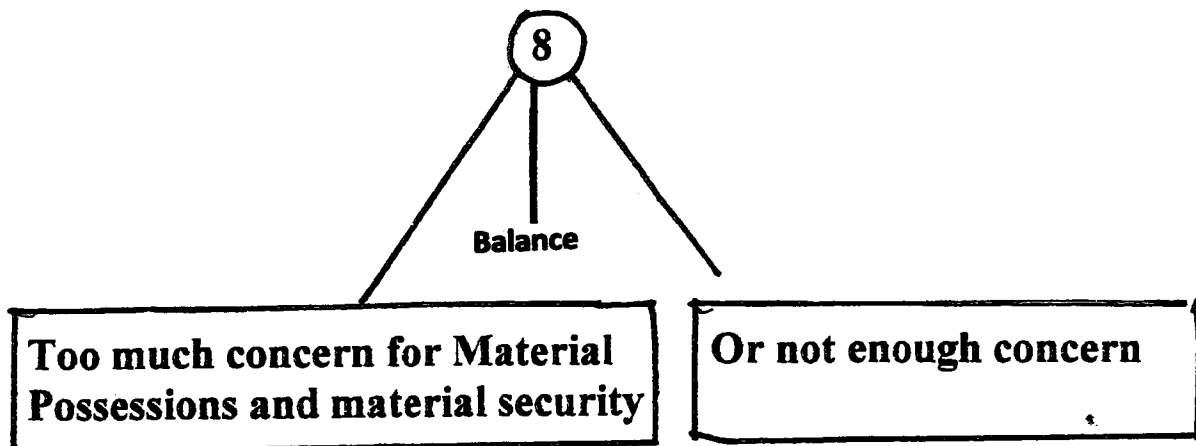

**You have to learn to be alone and not be lonely.**

### **HEALING:**

**You learn to develop faith in yourself and others.**

**Cultivate optimism and spiritual awareness.**

## CHALLENGE OF MATERIALISM

**Tendency is to be too concerned with money, more power, more success.**

### **Healing :**

**You learn to handle things thoroughly and well, and exercise good judgment in all matters. It is a time to learn to manage you finances well, spending carefully and avoiding extravagance.**

**Manage things yourself—don't turn control over to others.**

**Make you time and efforts count.**

**Meet business matters head on and make sure that they are taken care of. Above all, keep you head about you. Whatever you do should be guided by reason.**

**Although this is a time for handling material matters, you must take care that they don't become the dominant factor in you life. Remember that even material things are governed by spiritual laws, for in truth, all things are spiritual. Learn to see all things in their proper perspective.**
